

Security Center mobile app

Applications:

Video Surveillance · Access Control

Stay connected while in the field

Responding to incidents or emergencies in the field often requires operators to be away from their workstation. Security Center Mobile equips security personnel with unified mobile applications for their phones and tablets, allowing them to remotely connect to their security system and receive instant event notifications at all times.

No matter their location, security personnel can monitor their video surveillance and access control systems, receive and acknowledge alarms, and even stream live video from their phone back to Security Center, extending their capability to react to any situation.

Key benefits

Monitor your Genetec™ video surveillance and access control systems from anywhere

Quickly respond to incidents with instant alarm notifications from mobile devices

Send live video from iPhone and Android phones directly to Security Center workstations

Key features & specifications

Unified video and Access Control:

Security Center Mobile enables operators to monitor access control events with associated video and cardholders pictures.

Real-time video streaming:

Capture and send live video to Security Center, turning your smartphone into a mobile surveillance camera.

Mobile alarm notifications:

Receive instant push notifications for active alarms and acknowledge these alerts directly from your smartphone.

Playback video and bookmark events:

Instantly playback video and search archived recordings, and rapidly bookmark key events directly from your mobile phone.

Remote door access:

Monitor door status, view access granted/denied events, put doors in maintenance mode, and unlock doors remotely.

Device activity reports:

Reports allow administrators to monitor failed login attempts, device activity, and identify restricted devices.
